New Lawn Care

WATERING

- During summer heat, water twice a day for 2-3 weeks
- Water daily for the first 7 to 10 days
- Water every other day for 7 days
- Water every 3 days for the next 7 days
- Water every 4 to 5 days thereafter if no rain fall

FERTILIZING

- Fertilize with a 2:1:1 ration (example – 15:8:7) in:
April
Mid-June
August
- Fertilize with a 1;2;1 ration (example- 10:20:10) in:
November

MOWING

- Mow, 2 weeks after planting, at a low setting (1" to 1 ½")
- In July and August, raise mower 1 notch (2" to 2 ½")
- In November raise mower to 2 ½" or higher
- Leave Grass tall for a winter blanket

HINTS

- Scalp and clean up yard in March
- Water in the morning to avoid fungus
- Fertilize 3-4 weeks after planting using 2:1:1 ratio
- Treat for Grubs in late July early August
- Don't use a weed and feed for the first year
- Water before any severe cold temperatures
- Treat for fungus with fungicide when circles first appear

- **Spray infected area, then spray entire yard**
- **Re- spray infected area in 2 weeks**

GOOD LUCK WITH YOUR NEW LAWN!!!
