

## Pool Care Notes

Proper pool maintenance is essential for the long term health of your pool, equipment, and the people using it. Please don't hesitate to contact BMR Pool and Patio directly if you have any questions about the use and care of your pool. Thank you for your business!

### Daily

- Run Pump 10-12 Hours per day
  - Timer will be set to turn on automatically
  - More time= Cleaner water
- Run Automatic pool Cleaner
  - Timer will be set to run automatically
- Check Skimmers for Obstructions
  - Pool Toys
  - Sticks or leaves
  - Etc...
- Check Water Level
  - Full is at the bottom of the overflow drain grate

### Weekly

- Check and Add Chemicals
  - PH
    - Normal Range is 7.2 to 7.6
  - Chlorine
    - Normal Range is 1-3 ppm
  - Alkalinity
    - Normal Range is 80-120 ppm
  - Salt ( If applicable )
    - Normal Range is 3000 ppm
  - Add chemicals per label directions

Brush all Tile and Plaster Surfaces

Empty and Rinse Cleaner Bag

Empty Skimmer Baskets

Empty Pump Basket

Shock the pool as per label instructions.

- This treatment restores the sparkle to the pool water and destroys germs and organic contaminants (can be done once every 2 weeks)

## Monthly

Take sample of water to local pool store to check chemicals

- Pool store will test for:

- Calcium Hardness

- Stabilizer Level

- Salt Level

- Add chemicals as needed per label directions

Backwash Pool Filter ( If it is a DE filter. Not required on Cartridge Filters )

## Quarterly

Disassemble and Clean Filter per Owner's Manual

Remove and Clean Salt Cell per Owner's Manual
